

# **Important Announcement Regarding Street Parking**

**The Department of Public Safety and Department of Public Works and Urban Development would like to advise that an ordinance was passed on December 10, 2017 prohibiting parking on certain streets to provide better access to First Responder vehicles. DPW employees are presently installing signs on the streets that will be affected. There will be a three week grace period of no enforcement after the signs have been installed for acclimation. We appreciate everyone's cooperation. Thank you.**
